Contest Manager's Comments

Same number of participants of last year, with entries from nine countries and two Continents.

All the SWL logs have been checked versus the Ham logs with the software made by Marek SP7DQR, with the exception of the log of Vladimir R3A-847 which has been the only participant in the 24-Hour Mixed Category. His score shows only the claimed QSOs.

Vladimir R3A-847 got a great declared score and also Richard OK2-31097/DL, second in the general (unofficial) category, got a good score with over 2000 points and 86 multipliers. Patrick F-59706 follows with over 130.000 points and a good spoil for the IOTA SWL Marathon, which is going to win. Other category winners are Dusan OK2-9329, an old-timer of this Contest, in the 12-Hour mixed and Wolfgang DL-P01-17291 which, after the Volta Contest, won also the 24-Hour CW.

The percentage of QSO correct is shown in the “%” column of the results with the best percentage collected by Kishore VU2-002SWL with 82% of the QSO correct. Unfortunately a new entry from Thailand, Mai HS3VHW/SWL, did not include in the log the complete report of the station heard and consequently his percentage is zero.

I remember that the IOTA references heard and confirmed in this Contest can be submitted without QSL for the IOTA program. At this time the 2012 IOTA Contest data have already been uploaded to the IOTA database and credits can now be claimed. You can see the procedure at <http://www.radioascolto.org/swl>

Congratulations to all our winners and thanks to all who took part. I hope you come back next year.

Vy 73,
Dan Rolla, I1-12387
